

# TAS50

## H Class Air Scrubber

Tornado TAS50 is a powerful and reliable air scrubber to handle tough air cleaning jobs in construction site. The max airflow is 2000m<sup>3</sup>/h, and can be run at two speeds. The primary filter will capture the large particle before it comes to the HEPA filter. The larger and wider H13 filter is tested and certified with efficiency >99.99% @0.3 microns, to create a super clean air. The warning light will come on and the alarm will sound when the filter is blocked. Thanks to the compact and light design, the machine is easy to move and portable in transport in transportation.

Product Details			
Voltage	1 phase, 230v	Per filter area	0.64m <sup>2</sup>
Power	610w	H3 filter area	10.5m <sup>2</sup>
Current	2.9amp	Dimension	750mm x 500mm x 850mm
Airflow (max)	2000m <sup>3</sup> /h	Weight	38kg

Adjustable  
Airflow

H Class

### Main Features

- H Class
- Noise level 68dB (A)
- Equipped as standard with an hour meter and an extra socket
- Non-marking puncture-free lockable wheels
- Fitted with an air outlet connector with 254mm diameter for connecting the evacuation hose (8m max)
